

SAIES Control Tower

Data Dictionary

NSF Undergraduate Research Program · CSULA · Spring/Summer 2026

Key types	PK Primary Key — uniquely identifies each row	FK Foreign Key — links to another table	— Measure or attribute column
-----------	--	--	-------------------------------

FACT TABLE	fact_sales
------------	------------

The core transaction record. One row per sales order line item — captures what was sold, to whom, where, when, at what price, and how much profit it generated.

Technical name	Plain English meaning	Data type	Key	Example value
fact_sales_id	Unique record ID	INT	PK	1, 2, 3...
product_key	Links to product catalog	INT	FK	7 → Cheese
location_key	Links to region and city	INT	FK	3 → Hamburg, North
customer_key	Links to customer account	INT	FK	5 → Customer 80295
sales_org_key	Links to sales organization	INT	FK	2 → Org O3
date_key	Links to calendar date	INT	FK	12 → Jan 14, 2022
sim_key	Links to simulation round and step	INT	FK	8 → Round 2, Step 5
SALES_ORDER_NUMBER	Order number	INT	—	3241
LINE_ITEM	Line position within the order	INT	—	1, 2, 3
QUANTITY	Units ordered	INT	—	39
QUANTITY_DELIVERED	Units actually delivered	INT	—	39
NET_PRICE	Price per unit (EUR)	DECIMAL	—	26.99
NET_VALUE	Total sale amount (EUR)	DECIMAL	—	1,052.61
COST	Total cost of goods sold (EUR)	DECIMAL	—	900.90

Legacy SAIES Data Dictionary

SAIES Control Tower Data Warehouse Archive

Technical name	Plain English meaning	Data type	Key	Example value
CONTRIBUTION_MARGIN	Profit on this sale (EUR)	DECIMAL	—	151.71
CONTRIBUTION_MARGIN_PCT	Profit as a percentage of revenue	DECIMAL	—	0.14 = 14%

FACT TABLE	fact_pricing
------------	--------------

Price history record. One row per product price setting — tracks how each sales organization changed prices across simulation rounds.

Technical name	Plain English meaning	Data type	Key	Example value
fact_pricing_id	Unique record ID	INT	PK	1, 2, 3...
product_key	Links to product catalog	INT	FK	3 → Milk
sales_org_key	Links to sales organization	INT	FK	1 → Org O3
date_key	Links to calendar date	INT	FK	1 → Jan 1, 2022
sim_key	Links to simulation round and step	INT	FK	3 → Round 1, Step 3
DISTRIBUTION_CHANNEL	Sales channel code	INT	—	16
DC_NAME	Sales channel name	VARCHAR	—	Retailers
PRICE	Listed price in EUR	DECIMAL	—	26.99
CURRENCY	Currency used	VARCHAR	—	EUR

DIMENSION TABLE	dim_product
-----------------	-------------

Product catalog. Describes each of the 6 dairy products sold across all 7 sales organizations (42 unique product combinations).

Technical name	Plain English meaning	Data type	Key	Example value
product_key	Unique product ID	INT	PK	1 through 42

Legacy SAIES Data Dictionary

SAIES Control Tower Data Warehouse Archive

Technical name	Plain English meaning	Data type	Key	Example value
MATERIAL_NUMBER	SAP product code	VARCHAR	—	OO-T01
MATERIAL_DESCRIPTION	Product name	VARCHAR	—	Milk
MATERIAL_TYPE	Product category	VARCHAR	—	Trading Goods
MATERIAL_CODE	Short product code	VARCHAR	—	T01
MATERIAL_LABEL	Display label	VARCHAR	—	Milk

DIMENSION TABLE	dim_location
-----------------	--------------

Geographic information. Describes where orders were shipped and which warehouse fulfilled them across 3 areas (North, West, South) and 9 German regions.

Technical name	Plain English meaning	Data type	Key	Example value
location_key	Unique location ID	INT	PK	1 through 12
STORAGE_LOCATION	Warehouse code	VARCHAR	—	03N = North warehouse
REGION	German state or region	VARCHAR	—	Hamburg
AREA	Sales area	VARCHAR	—	North, West, or South
CITY	Delivery city	VARCHAR	—	Hamburg
COUNTRY	Country	VARCHAR	—	Germany
POSTAL_CODE	Postal code	INT	—	22769

DIMENSION TABLE	dim_customer
-----------------	--------------

Customer accounts. The 12 retail customer accounts that placed orders during the simulation.

Legacy SAIES Data Dictionary

SAIES Control Tower Data Warehouse Archive

Technical name	Plain English meaning	Data type	Key	Example value
customer_key	Unique customer ID	INT	PK	1 through 12
CUSTOMER_NUMBER	Customer account number	INT	—	80295
DISTRIBUTION_CHANNEL	How the customer buys (channel code)	INT	—	16 = Retailers

DIMENSION TABLE	dim_sales_org
-----------------	----------------------

Sales organizations. The 7 competing teams in the ERPsim simulation, each managing their own pricing and distribution strategy.

Technical name	Plain English meaning	Data type	Key	Example value
sales_org_key	Unique org ID	INT	PK	1 through 7
SALES_ORGANIZATION	Team or organization code	VARCHAR	—	O3, P3, Q3, R3, S3, T3, U3

DIMENSION TABLE	dim_date
-----------------	-----------------

Calendar dates. Covers 41 unique dates from January 1 to February 10, 2022, spanning the full simulation period.

Technical name	Plain English meaning	Data type	Key	Example value
date_key	Unique date ID	INT	PK	1 through 41
SIM_CALENDAR_DATE	Full calendar date	DATE	—	2022-01-03
SIM_DATE	Simulation date label	VARCHAR	—	01/03
SIM_PERIOD	Billing or reporting period number	INT	—	1 = January, 2 = February

DIMENSION TABLE	dim_simulation
-----------------	-----------------------

ERPsim game structure. Tracks the 4 simulation rounds and their individual steps, enabling round-over-round performance comparison.

Technical name	Plain English meaning	Data type	Key	Example value
sim_key	Unique simulation step ID	INT	PK	1 through 41
SIM_ROUND	Game round number	INT	—	1, 2, 3, or 4
SIM_STEP	Step number within the round	INT	—	1 through 10
SIM_ELAPSED_STEPS	Total steps completed so far	INT	—	1, 2... up to 40
